POP ART WITH A TOUCH OF CLASS

# DAN PEARCE

Contemporary street art meets classic pop art in Dan's striking and subversive comments on contemporary culture. Bringing together such disparate styles and materials as graffiti, traditional painting, collage and textured resin, he creates high-octane original pieces that turn heads from a distance, then take on a whole new meaning when seen at close range.

Dan's playful new limited edition offers an irreverent yet affectionate take on the world's most iconic profile. Despite showing Her Majesty the Queen in a familiar setting which we see every day, this eye catching portrait still takes us by surprise with its unexpected presentation, colours and visual jokes. Each piece in the edition has its own unique graffiti making it even more collectable.
